Selection Settings	10

# Introduction

Every record list page that you have permission to view in RiskMan can be configured to suit your requirements. Further to this, each record list page can be configured *individually*, meaning that for example if you can see the

- Entered Incidents page,
- Incident Inbox page, and
- Posted Incidents page

...you can set each one up with its own unique configuration.

You are able to:

- Change the columns being displayed, their widths, and the order in which they appear
- Change the number of rows shown per page
- Change the way the list is sorted, grouped, and filtered
- Save the way you've configured the page as a "View", and switch between your personally configured views
- Export the resulting list page to a Microsoft Excel file if you wish

This guide also explains list page functionality which is based on user permissions, so you might not have permission to some of these functions (it depends on your level of access). These include:

- Ability to generate a "Letter", based on an existing record in a register
- Ability to clone or update a record
- Ability to reassign ownership of a record

#### (i) Note

This information in this guide applies to <u>any</u> register, however we have used an Incident register in the screenshots as it is the most universal register.

# List page basics

Here's an explanation of the common functions on your list pages:

	٢	N	fy Wor	kspac	e • Ma	nagement	<ul> <li>Administration</li> </ul>	n • Reports • Hel	p • Log Out Feed	lback Module		USER: System Manager (M

- You cannot modify these columns; they will always be displayed as-is.
- Oclumns that you can change: Column order, widths, show/hide, etc
- Pagination info: Total records and page count
- 9 Pagination: Change the number of rows showing per page; navigate to first / previous / next / last page
- S Toolbar: When you select a record, the available functions/options for working with that record appear here
- **6** Toolbar: Options for configuring and working with your list page overall

#### The fixed columns: Explanation

• "Administrative" status of the record. Click the California icon for more information.

• Your personal viewing status of the record. Green: You've never opened it. Grey: You have opened it. Red: Since you last opened it, someone else has modified it. Also, click the icon to open the Review History of the record.

• The paperclip tells you there is at least 1 document attached to the record

• Dist is short for Distribution List. Usually it will say None. In this example, there is a number -1 - in one of the rows. This represents the number of users who have been put on the Distribution List for that record *who have not yet viewed it*. This column is also a shortcut – click it to distribute the record to other users.

**6** Record selection check box: Tick the box to select a record, and the options in the toolbar will appear.

**6** ID number: Click on the record's ID number to open it. Note that you <u>do not</u> need to check the record's selection box before clicking the ID number!

1	2	3	4	(5)	6

# Modifying your list page

Changing the columns shown on your page

#### Essentials

Click the Change Columns icon in the toolbar.

The Change Columns dialog is shown. Highlighted at the top of the list are the columns currently being displayed on your list page:

nge Columi		4
	Change Columns	Cancel Save
	This page allows you to choose which columns of information you would like to :	see on your Incidents page.
		Display 'Advanced' Columns
#	Field Label	
•	3	
1 🛛	Incident Date	
	Incident Involved	
<b>V</b>	Location	
<b>V</b>	Summary	
<b>V</b>	Outcome	
<b>V</b>	Facility	
<b>V</b>	Group	
	24 Hrs prior to Patient in	
	A.C.D. Completed After MET	
2	A.C.D. Prior	
	A.C.D. Suggested	
	Activity At The Time	
	Acute Illness	

- Uncheck to remove column
- 9 Scroll through the list of fields and check each one you want to display as a column on your list page
- Oan't find what you're after? Start typing a field name here to search the list
- O Click the Save button once you're done. Your list page will refresh, and the columns you selected will be displayed.

#### Extras

You can edit the **Field Label** if you like. You might do this to abbreviate a long field name. Your changes are only visible on this list page, and they will not affect any other part of the system.

		Change Colun	nns	Cancel Save
т	his page allows you to choose whi	ch columns of informat		on your Incidents page. 🛛 🎯 splay 'Advanced' Columns 🗹
#	Field Label	Sort Order	Field Name	Field Type
~	Incident Date	1	IncidentDate	Incident
•	Incident Involved	4	IncidentInvolved	Incident
✓	Location	5	Incident_Location	Incident
•	Summary	6	Description	Incident
	Outcome	7	Outcome	Incident

Check the **Display 'Advanced' Columns** box to show additional information for each field. You might need to use this option to differentiate between several fields from your register that have the same label; in which case, you could determine which is which by referring to the **Field Name** column, which contains the unique name of that field in the database.

#### Change the order of your columns

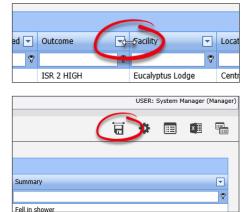

Simply click and drag a column header to a new spot to rearrange your columns. When you see the two white arrows, you can release your mouse button. The system remembers your changes as you go.

#### Adjust the widths of your columns

Once you have your columns in their desired order, you can adjust their widths to make the best use of the space available on your screen. We recommend adjusting them from left to right.

Put your mouse cursor on the line the separates each column. Click and drag left to right to adjust as needed.

Once you have adjusted all the column widths as desired, click the save icon in the toolbar to save your changes.

Note that the save icon only appears in the toolbar *after* you've started adjusting the width of your first column.

#### Sort your list

Click on a column heading to sort your records by values in that column.

The arrow represents whether you are sorting in ascending or descending order.

The column you sort by will always be remembered on this list page.

## Group the records on your list page

Group the records based on one of the columns showing in your list. In this example we've grouped our incidents by their severity rating:

?	6	Sel	ect a	record	to dis	splay the a	available tools.			INB	0)		cidents for Re ents and edits of Incidents	vie	W
Οι	utcom	ie 🔺	•

You can add subsequent grouping levels by following the same steps.

To **remove** a level of grouping, simply click and drag the column header back to where you want it to be in the list.

### Filter your list

You can apply a filter to one or more of the columns showing on your list page, so that you only see a specific subset of the records in your list. Each column header has a filter box underneath it:

2	S	elec	t a rec	ord t	o displa	y the avail	able t	tools.			IN			dents for Revi and edits of Incidents	ie	W	🌣 🗐 🗷	
rag i	a colu	mn h	header	here	to group	by that co	lumn

o 🗆 💷

#### Save the way you have configured your list as a "View"

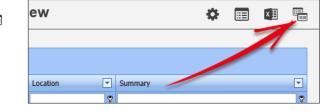

Once you have setup the columns you want, and applied sorting, filtering, or grouping to your list, you can then save that configuration as what is called a View. You can have multiple saved views that you can switch between with the click of your mouse.

In this example, we've grouped our records by the Incident Involved field, and we have sorted the records by incident date.

In order to save this as a view, we need to click the View icon in the toolbar.

ю.

Views × Views Views allow you to save the current configuration of your list of records (columns displayed, sorting, grouping and even any filtering applied either from the grid or the Selection Settings popup) for future use. You can then Apply any View you have previously saved and instantly change the setup of your list. Save the current list configuration as a View **B**<sub>2</sub> By Incident Involved Saved Views for the (Incident Inbox) View Name Apply 4 By Location and II Ŵ ŵ 4 By Outcome

p • Log	Out		USER: S	System Manager (Mana	ager)
	idents for Review		\$	III 🗐 🦷	
iew inciden		View Name		Appl	IV I
	By Incident Involved			4	
	By Location and II			4	
	By Outcome			4	
		on			-
8	♥	♥		9	₹

#### • Type a name for your View.

Olick the Save icon . You will be returned to the list page, and a message will be displayed to confirm your view was saved.

S You can delete any of your existing views by clicking the respective Delete icon III.

You can now switch between your saved Views by hovering your mouse (do not click) over the Views icon 🛅, and clicking the **Apply** icon **f** of the View you wish to load.

### Export the list page to Excel

You can export the records shown on the current list page by click the Excel icon 💵 in the toolbar.

Only the first page is exported, so if you list contains more records than can be displayed on one page because of your pagination settings, simply increase the number of items per page so that they fit on to one page.

۲	None <u>3723</u>	7	Blah blah blah ISR 4 MINOR
177 Records Found	(Page 1 of 18)		Items per page: 10 • 《 < 1 • > >>
،	■ None □ 2	е	Inform Injury to low Returned to f

#### **Selection Settings**

In the toolbar, you'll note the Selection Settings cog icon 🏶. It contains the following functionality:

- Switch between the various record list pages that you have permission to view
- Restrict the records being shown on your page by record type; in this example by Incident Involved

• Restrict the records being shown on your page using date filters (the date fields available will vary by register)

Restrict the records being shown on your page by specific record ID numbers. Separate multiple ID numbers using a comma, e.g. 51,73,106 etc

Selection Settings		х						
Selection Settings								
Display:	1 Inbox (Incidents)							
Incidents Involving:	2 All Incidents 🔹							
Date Entered:	From To							
Incident Date:	From 🔽 To 💽							
Notification Date:	From To							
Incident IDs:	4							
Allow rows to expand vertically: 5								
	Clear	7 Layout						

• You set the width of the columns you have chosen to display on your list page. By default, if any individual cell contains more information than can be shown, the information will be truncated, and an ellipsis displayed instead.

Enabling this setting will force the content to be displayed; information in the fields will wrap instead of being truncated.

Left: Setting turned off Right: Setting turned on

**6** Once you have configured the various settings, click the **Apply Settings** button. Your list page will refresh with your desired settings in place. The settings you apply here will be remembered until you decide to change them.

Should you wish to return your list page back to a "default" configuration, click the Clear Layout button. This returns your list page to the default settings, including columns displayed, removing all sorting, filtering, and grouping, and clears all of the settings applied in the Selection Settings dialog. Note that any Views you have created will not be affected by this action.
