CRLDatix

Introduction

This reference guide is aimed at RiskMan Administrators who will be responsible for maintaining all the Register (e.g. Incidents, Feedback, Risks, Quality Activities) and non-Register specific lists used in your RiskMan

What are the Lists & Codes?

The List & Codes Maintenance provides Administrators with the ability to view the content of all the list fields used in your RiskMan with access to editing, adding or deleting lists

In addition, users with the appropriate permissions can import list items from an Excel[™] document saved as a CSV file into specific lists

A detailed description of the standard lists available in the List & Codes Maintenance can be found in the **RiskMan List & Codes Maintenance Description Guide** accessed from the *Help* menu under *Reference guides*

What user permissions do I need to access the List & Codes Maintenance?

For a user to have permission to the List & Codes Maintenance page they will need the following permission

• General Administrative Permissions: Can maintain codes (e.g. Site list)

What user permissions do I need to import data into the List & Codes Maintenance?

For a user to have permission to import data into the Lists they will need to have access to the List & Codes Maintenance page and have the following:

- General Administrative Permissions: Can import list
 from Excel
- In addition the **Import** button needs to be enabled on the lists that you wish to import into

Note: This requires assistance from RiskMan Support – <u>https://hub.rldatix.com/SupportHUB/s/</u>

How do I access List & Codes Maintenance?

- 1. From the menu select Administration -> List & Codes Maintenance
- 2. When some lists are selected you will see an

information icon • • • • This will show additional about the list in question.

•	0	0					Lis	st & Codes Main	tenance
					List Name	: (Incid	ents) Body Part /	Affected Graphics	٣
This	ist allows	you to	name the body	parts used in graph	ical selectors				
					Body Part Description	Ŷ	Sort Order 🕈	Graphic Name	 Body Part Name
						Ŷ	:		٣
					Not stated/inadequately de	escribed	29	None.gif	None
					Lower Right Front Abdome	n	49	Lower_Right_Front_Abdomen.c	if Lower Right Fron
					Hand Right		30	Hand_Right.gif	Hand Right
					Hand Left		31	Hand_Left.gif	Hand Left
			alling stars to be a star		Front Right Thigh		57	Front_Right_Tigh.gif	Front Right Thigh

The maintenance lists are segregated as follows:

(Alerts) – Lists specific to Alert Management.

(Feedback) - Lists that are specific to the Feedback Register will be pre-fixed with (Feedback).

(Incidents) - Lists that are specific to the Incident Register will be pre-fixed with (Incidents).

(Quality) - Lists specific to the Quality Activity Register w	/ill
be pre-fixed with (Quality).	

Note: These lists will only be available if you have purchased RiskMan Q

(**Risk Register**) – Lists that are specific to the Risk Register will be prefixed with (Risk Register)

No prefix – All other lists that are either shared between the Registers or are non-Register specific e.g. pop-up messages targeted at individuals or all users on a template

Note: Additional list items may appear in your List & Codes Maintenance, depending on what Registers you have available and any additional extensions that you might have available. These will either appear with no prefix or will have a related prefix e.g. The Register Name; Or the extension name e.g. (MET) for those who have the MET extension in their Incident Register

How do you access a list in the List & Codes Maintenance page?

 If you want to narrow down your search, choose the appropriate register from which you want to alter your lists under Lists for Register 1 If you want to conduct a general search, select {All}

ist Name:	(Feedb	ack) Rela	ated Ser	vice			*	Lis	ts for Register:	_	J	
	ID		ID Related Service			Sort Order 🔻 🖪		•		{All} Feedback Register Incident Register	^	
					۴	.			1	Risk Register	~	
			19769	Community Care		1	ø	⑪				
			22189	Executive		0	ø	面				
			19789	Finance		3	ø	⑪				
			22909	Information Technology		7	ø	童				
			22388	Property Services		4	ø	⑪				
			19785	Quality Support		2	ø	⑪				
			19688	Residential		1	ø	⑪				
			19776	Respite & Direct Care	е	1	ø	⑪				

 Select the relevant list from List Name. You can do this by either Oscrolling down to find the applicable list name amongst all lists within the register or O typing part of the list name you are looking for so the lists will be filtered accordingly

List Name:	1	-			or Register: {All}

The below options will appear:

Settings	ж
Number of rows to display:	20 -
Include actual listname in list selector:	
Edit rows using a Form:	
Make the grid the fill the page width:	
Display the row ID column:	
Apply	
	1.

Below is an outline of each setting and its purpose. Select the options which are relevant to you and click **Apply**.

- Number of Rows to display Allows you to select how many rows are displaying per page
- Include actual listname in list selector: The default setting in Lists & Codes Maintenance is to show the List Caption or the friendly name of the list. This is the name that users can see when utilising the system (e.g. on an incident entry form). The Actual Listname, on the other hand, is the underlying database list name. If this option is ticked, you will see both the friendly name¹ and the actual listname² under ListName:

.ist Name:	Reporter's Position [NatureOfEmployment]	×	-	Lists for Register:		
	List Caption	A	ctua	I Listname 🛛 😢		
	Reporter's Position	NatureOfEmployment				
	(Incidents) OH&S Nature of Injury List	N	atur	eOfInjury		
	(Incidents) Notifiable Events	N	otifia	ableEvents		

Please note that in the majority of cases users will not need to enable this setting as it is largely used for programming purposes only.

3. Edit rows using a form – This option allows the user to change the way lists and codes are edited.

If the Edit rows using a Form option is selected, each list

will have a (edit) icon next to it. By clicking on this icon, drop-down boxes for the relevant list will appear to enable the user to make any necessary changes with sufficient space. After any changes are

made to the list, click on the icon solution to save. If you want to close the drop-down box for a list without

saving changes, click on the **o**icon. Be aware that when using form edit mode, lists can only be edited and saved individually.

	♥ <u>Create Filter</u>				

Note: There may be some situations where RiskMan will not let you delete a list item as it is being used elsewhere e.g. Site lists if they are linked with a User's Profile Restrictions. If this is the case you may need to contact RiskMan Support to look at having your existing data re-mapped before you can delete the list item.

How do I edit an existing list item?

There are two different methods by which a user can edit an existing list item. Please refer to the section **What general settings can be adjusted on the Lists & Codes Maintenance page?** in this guide. Topic 2 *Use Form Edit* explains the different methods by which lists can be edited.

Note: Changing or deleting an entry in a list simply changes the list entry – it does not alter any notifications/activities, user profiles, alerts or risks that have already been classified using the amended or deleted entry. **For example**: If the "Paediatrics" entry in the Programs list is altered to "Children's Health", any notifications/activities/items on file that were classified using "Paediatrics" will remain as "Paediatrics". Contact support at RiskMan Support – <u>https://hub.rldatix.com/SupportHUB/s/</u> if remapping is required as a result of changing or deleting a list item

Can I sort my lists?

- 1. With a list selected, click on the column heading 0
- 2. An **arrow 2** will appear next to the heading indicating the direction of the sort (ascending or descending)

RISKMAN QUICK REFERENCE GUIDE TO MANAGING LISTS

If you wish to sort the column in the opposite direction click on the column heading

Can I export my lists to Excel™?

2.

1. Arrange your selected list e.g. sort or filter

- 3. You will have the option to save or open Excel[™]
- If you select **Open**, your maintenance list will open in Excel[™]
- 5. If you press **Save**, save your list. You will then have the option to open your list
- If you have filtered your list, only the filtered items will be displayed in the Excel[™] document

Note: If changes are made to the list in Excel[™] you can import your data back into the list in RiskMan – refer to the section "How do I import data into a list?"

How do I import data into a list?

Data file requirements

- The file you are importing **MUST BE** a **CSV** file (this file format is saved from an Excel[™] spreadsheet)
- The content of the data MUST contain the SAME heading names as the list you are importing to, In addition the NAME of the list e.g. SiteLocation, MUST be included in your CSV file

Note: Assistance from RiskMan support will be required to obtain the List Names

Example of the CSV file for the Site/Location list

	and a state of the	

- Test Only this is where you can test if the Spreadsheet from which you're importing is valid or not before importing the data. If the file is valid it will state *List* validates correctly. If the file is not valid it will state Invalid File type.
- Replace List this is where you import the applicable Spreadsheet to your current list and replace it with the existing data

0

RISKMAN QUICK REFERENCE GUIDE TO MANAGING LISTS

- **↓ RLDatix**[™]
- Append to list this is where you add data from the applicable Spreadsheet to the current list so that the list now contains both existing and appended data
- Edit List this is applicable if the Spreadsheet contains existing data with several amended changes. The system will pick up on changes made to the current list and edit the list as necessary. Please note that this setting will only work if **Display ID column** setting is switched on and the relevant ID is also showing in the attached Spreadsheet. This way the RiskMan system can gauge what data has been amended based on the relevant ID number.
- Locate the CSV ⁽²⁾ file that contains the data you wish to import
 - Only check the Replace existing data ④ option if you are replacing your list with your new list, otherwise the imported data will be appended to your existing list

Note: If you do replace your list with a new list you may wish your existing data e.g. Incidents, Feedback, Risks, Quality Activities, User Profiles or any other Registers to be remapped to your new lists. If this is the case contact RiskMan support – <u>https://hub.rldatix.com/SupportHUB/s/</u>

5. Press Upload 6

6. Your list will be updated

Administration Icon

The Administration icon is available to access Lists and Codes that are not available to Administrators. The icon is presented for RiskMan support purposes to allow the RiskMan support staff to access these lists if required.

2. If you have selected **Use Form Edit**, your screen will look as below:

		List & Codes Maintenance					٥	1
	List Name: (Incident	ts) TooTip Definitions (TooTip_Inddents) - Lists	for R	egister. Incide	rt Register	٠		
A type of Nouseover will clapicy a trob The other types will clapicy a static Too	tio when the field gets the focus, whi	ch disappears when the focus is lost.

Regardless of which setting you are on, the field options will be the same.

Label of the Field to show ToolTip on: Select the field or button that you wish to associate the Tooltip with

- 3. Bottom Tip: Enter the description for this tool tip.
- 4. Top Color: Select a colour for your Top Tip
- 5. Bottom Color: Select a colour for your Top Tip
- 6. **Tool Tip Type:** There are 4 types of tool tips that you can select it is recommended to select MOUSEOVER

To appear as an option in this list, a Template must exist under the 'General' tab or in the 'Incidents' register.

This list will have no effect on users created by an administrator.

Using HTML Codes to enhance your Tool Tips

Your tool tips can be enhanced by including one or more of the following: bold, underline or italicise words; add paragraphs; add line breaks; add bullets and numbering to separate text within a tool tip. Simple HTML code can be used to include these enhancements. On the next couple of pages are some examples of Incident Tools tips using HTML Code which you can replicate in your RiskMan

TOOL TIP EXAMPLES FROM THE INCIDENT REGISTER

Tag	Example using the Tags	Sample tool tip
Bold 	Notification Date	Notification Date The Date The Incident was Notified to Group Clinical Governance.
Italics 	risk or risks	Click here to associate a risk with an incident Please select the <i>risk</i> or <i>risks</i> that this incident relates to
Underline <u></u>	<u>risk</u> or <u>risks</u>	Click here to associate a risk with an incident Please select the <u>risk</u> or <u>risks</u> that this incident relates to
Bold/Italic 	Not Required	Action Taken Specify any action taken to prevent a recurrence of this type of event. If no action is necessary, write <i>Not Required</i>
Line break	Nominate the severity of this incident, using the Incident Severity Rating document. To view and select an Incident severity rating for this incident, click on the icon next to this document.	Outcome Nominate the severity of this incident, using the <i>Incident Severity Rating</i> document. To view and select an Incident severity rating for this incident, click on the icon next to this document.
Paragraph Break with line of space	Nominate the severity of this incident, using the Incident Severity Rating document. To view and select an Incident severity rating for this incident, click on the icon next to this document.	Outcome Nominate the severity of this incident, using the Incident Severity Rating document. To view and select an Incident severity rating for this incident, click on the icon next to this document.
Horizontal Rule <hr/>	Nominate the severity of this incident, using the Incident Severity Rating document. <hr/> To view and select an Incident severity rating for this incident, click on the icon next to this document.	Outcome Nominate the severity of this incident, using the <i>Incident Severity Rating</i> document. To view and select anIncident severity rating for this incident, click on the icon next to this document.

Defining templates for self-registered users

1. Click on the List Name drop down and locate Default template to apply to self-created users, based on selected site list

licon

There is also a Global Setting 'Users/Authentication/LDAP Details/200) The RiskMan Template to use when selfcreating new users.' This will be effective only if the site is not found in this list.

- 2. Click on the 0 🗎 🌣 🕹 🏦 List & Codes Maintenance 👔 List Name: Default template to apply to self-created users, based on selected Site. 💿 🛛 Lists for Register. • mally they will receive the 'Default' template for each register, and for General. Which Registers a default user gets can be of to specify the Site field then this list will be referred to and, if the Site is found, the 'Default' template name to apply is retriev some 2 or more Sites, one will be elected randomly. en will attempt to be applied for each register. If the template does not exist in any register, the 'Default' template will be applied, for in the fill, at lemble man our under the General' fail or in the Incident's register. config If the dministrator. on/LDAP Details/200) The RiskMan Template to use when self creating new users.' This will be effective only if Site Template To assign. . 🕂 att ♥ Create Filter
 - 3. Select the site and template to assign for that site
 - 4. Save or Discard the changes

During self-registration, if the user is allowed to specify their own site, then the above list will be referred to and, if the site is found, the Tempalte the user should be allocated to is retrieved from here.

Should the user choose 2 or more Sites, one will be selected randomly.

Should the site appear more than once in this list, one will be selected randomly.

For each Register, the system will attempt to assign he user to the defined Template. If the Template does not exist in a Register, the user will be assigned to the 'Defulat' Template instead.
