WHAT IS THE HOMEPAGE?

The Homepage contains links to all the functions you have permission to access, arranged into panels, which we call Widgets. It also contains Shortcuts and Drafts, which we'll explain in more detail in this guide.

Though the homepage has a “default” setup, every user can configure it in a way that’s meaningful for them.

→ How to access the homepage

After logging into RiskMan, many users may automatically be directed to the homepage. Also, at any point, users can return to their homepage by clicking the **homepage** icon  in the RiskMan menu bar.

EXAMPLES

How the homepage will look depends on your RiskMan user permission level.

Default users might see something like this:

The screenshot shows the RiskMan homepage for a user named 'Reporter (Reporter)'. The interface includes a navigation bar with 'My Workspace', 'Reports', 'Help', and 'Log Out'. The main content area is divided into several widgets:

- Incidents:** Contains 'New Incident' and 'Review Incidents' buttons.
- Bookmarked Records:** A table with columns: Days, Assigned, ID, Notification Date, Summary. It lists three records:

Days	Assigned	ID	Notification Date	Summary
0	31 May 2016	95	24 May 2016	Cut Finger prearing Food
0	31 May 2016	90	24 May 2016	
0	31 May 2016	86	24 May 2016	Hurt back
0	31 May 2016	83	24 May 2016	Visitor Tripped in Car Park pothole
- Shortcuts:** Contains 'New Feedback' and 'New Incident' buttons.
- Feedback:** Contains 'New Feedback' and 'Review Feedback' buttons.
- Miscellaneous:** A placeholder for miscellaneous information.
- Outstanding Tasks:** Contains a reminder: 'Journal Entry 17 for Incident 98 has been allocated to you by Manager for follow-up before 24 May 2016'.
- Notifications:** A list of notifications:
 - 6 Incidents are listed as Need Review
 - 7 Incidents are listed as Newly Edited
 - 70 Incidents are listed
 - 4 Bookmarks are listed
 - 6 Distribution lists are listed
 - 1 Journal action has been allocated

Using the Homepage

Line Managers/Supervisors will see an extended version of the homepage:

The screenshot shows the homepage for a user named 'Supervisor (supervisor)'. The interface includes a navigation menu at the top with 'My Workspace', 'Management', 'Reports', and 'Help' (with a 'Log Out' link). The main content area is divided into several sections:

- Feedback:** Contains 'New Feedback' and 'Review Feedback' buttons.
- Miscellaneous:** A section for additional information.
- Notifications:** Lists various alerts: 9 Incidents need review, 24 are new, 17 are newly edited, 70 are listed, 5 bookmarks are listed, 9 distribution lists are listed, and 1 journal action is allocated.
- Outstanding Tasks:** A section for pending tasks.
- Incidents:** Contains 'New Incident' and 'Review Incidents' buttons.
- Bookmarked Records:** A table with columns 'Days Assigned', 'Notification Date', and 'Summary'. It lists several records, including one for 'Accidental Scratch' and another for 'After local sedation Mary bit her Patient was not feeling well'. A link is provided to view these records.
- Outstanding Journals I Allocated:** A notification that 'Journal Entry 4 for Incident 40 was created by you for follow-up before 25 May 2016'.
- Shortcuts:** A panel with 'New Feedback' and 'New Incident' buttons.

Higher level users & administrators may see something more like this:

The screenshot shows the homepage for a user named 'System Manager (Manager)'. The navigation menu includes 'My Workspace', 'Management', 'Administration', 'Reports', and 'Help' (with a 'Log Out' link). The main content area is divided into several sections:

- Bookmarked Records:** A section for saved records.
- Miscellaneous:** Contains 'Reminders & Alerts' and 'Edit My Manager' buttons.
- Managing Risks:** Contains 'New Risk', 'Review Risks', 'Risk Register', 'Risk Reports', and 'Risk Heat Map' buttons.
- Administration:** Lists various administrative tasks: 'New Organisational Structure', 'Organisational Structure Register', 'Global Settings', 'Alert Management', 'List & Code Maintenance', and 'Document Library'.
- Incidents:** Contains 'New Incident', 'Review Incidents', 'Incident Inbox', and 'Posted Incidents' buttons.
- Feedback:** Contains 'New Feedback', 'Review Feedback', 'Feedback Inbox', and 'Posted Feedback' buttons.
- Case Management:** A section for managing cases.
- Notifications:** Lists alerts: 24 incidents are new, 16 are newly edited, 70 are listed, 1 bookmark is listed, 1 action is allocated, and 2 journal actions are allocated.
- Outstanding Tasks:** A section for pending tasks.
- Shortcuts:** A panel with buttons for 'New Case', 'New Feedback', 'New Group', 'New Incident', 'New Organisational Struct...', and 'New Risk'.

DETAILED OVERVIEW

Homepage Layout

The Homepage is divided into two sections: Shortcuts and Widgets. The width and number of columns (including the shortcuts) varies automatically depending on the width of your browser window.

The Homepage supports customisation by the user, such as positioning, height, or visibility. The shortcuts can also be repositioned. All customisation is retained between user's sessions.

Widgets

Widgets are independent areas of the homepage that can be customised by expanding, collapsing, resizing, or moving around the screen. There are several types of Widgets. A user's assigned Template(s) will determine which Widgets are available to that user.

Broadly speaking, there are two types of widgets:

- Widgets that represent the functionality a user can access via the RiskMan menu
- Widgets that contain useful information specifically for the user

InfoCentre Widgets

Widget created using InfoCentre technology can be displayed on the homepage (charts for example). Only users with permission to manage the homepage can add or remove these widgets.

The example to the right shows a chart, in this case a gauge, being shown on the homepage.

If you display any InfoCentre charts on your homepage, some might be configured to look at a particular date range. You can change the date range those widgets are reporting on by clicking the **Settings Cog** , and adjusting the date range as required.

Shortcuts

A Shortcut allows you to create new record with some information already entered. They are designed to save time by eliminating the need to enter data which frequently needs to be recorded by a user.

For example, in a clinical setting, a nurse might frequently need to record falls which occur on a ward they work in. The nurse could create a Shortcut which starts a new incident, and pre-fills that the incident involved a patient, occurred in the relevant ward, was a fall, and so on. The nurse could then complete the rest of the details on the form and submit the incident.

Note

Shortcuts are a user permission and might not be in use in your system.

Drafts

A draft is a partially completed form that a user intends to submit at a later stage. Drafts might also expire after a certain period has elapsed (depending on your system configuration).

Note

Drafts are a user permission and might not be in use in your system.

USING THE HOMEPAGE

Interacting with the things on your homepage

Ways that users can interact with Widgets:

Action	Description	Screenshot
<p>MOVE WIDGETS</p>	<p>Move a widget to another place within the Homepage.</p> <p>Click and drag the black bar of a Widget to move it to a new position.</p> <p>Any changes made will be retained for each individual user.</p>	
<p>ADD WIDGETS</p>	<ol style="list-style-type: none"> 1. Click the Cog icon  to reveal the settings 2. In the Visible Widgets panel, click your mouse in the empty space to reveal the list of available widgets 3. Click on a widget name to display it on your homepage 	

REMOVE WIDGETS

1. Click the Cog icon  to reveal the settings
2. In the **Visible Widgets** panel, find the Widget tag that is to be removed
3. Click the  icon

RESIZE A WIDGET

To resize a widget, move your mouse cursor to the bottom of the widget until the cursor changes to the double arrows (shown here). Click and drag to set the widget to the desired size.

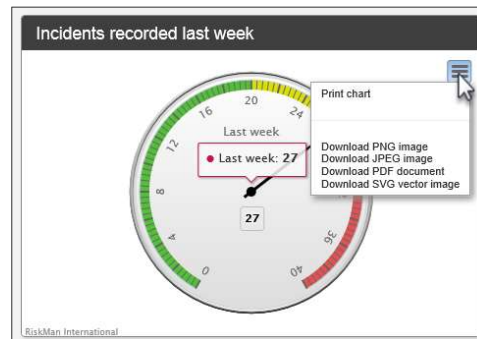

EXPAND AND COLLAPSE

Double click the black heading bar of a widget to collapse and expand it. The state of each widget is remembered.

PRINT OR DOWNLOAD

Widgets from the InfoCentre can be printed or saved as a file. Click on the  icon and you will see the available file formats, and the option to print the widget as it is.

Using shortcuts to pre-fill new forms

Once you have identified a need to create a new shortcut, follow these steps to create it.

For this example, we are going to create a shortcut in the Incident register, for common patient falls in a particular ward.

Pre-fill all required information

Start a new record in the appropriate register, and enter the details which will be consistent for every record based on this shortcut:

The screenshot shows a form with the following sections:

- Witnesses:** "Was the incident witnessed?" with radio buttons for "Yes" and "No" (selected).
- What happened?:**
 - Details:** A text field containing "Patient found on floor".
 - Add/remove incident type:** A dropdown menu with "Falls" selected.
- Impact / Outcomes:** A section with a link for "Initial Assessment".

Create your Shortcut

Scroll to the bottom of the form, and click the **Create Shortcut** button:

The screenshot shows the bottom of the form with three buttons: "Submit and Clone", "Submit", and "Create Shortcut". The "Create Shortcut" button is circled in red. An inset window titled "Save Shortcut..." is shown above the buttons, containing the following information:

- Title:** Unwitnessed PT Fall
- Description:** New pt falls on SA where pt found on floor (most common type)
- Icon:** A small icon representing a person falling.
- Buttons:** "Save" and "Close".

Using the Homepage

Shortcut Properties

Title: The name of your shortcut as it will appear on your homepage.

Description: The description you type here will be displayed as a tooltip when you hover your mouse over the shortcut on the homepage.

Icon: Choose an icon for this shortcut.

Choose what to do next

Once you have created your shortcut, you will be taken back to (in this case) the incident entry form. This allows you to the chance to fill out an entire incident form, if that is what you intended to do before creating your shortcut.

If you only wanted to create your shortcut, you could navigate back to the homepage.

Updating the pre-filled content of your shortcut

If you want to update which information is pre-filled when you start a new record based on a shortcut, simply click the shortcut on your homepage.

Make any modifications you want to the form. When you navigate to the bottom of the page, you will see a button labelled **Update Shortcut**:

When you click the button, you will be presented with Shortcut Properties dialogue. Make any changes if required, and click the **Save** button.

Saving partially completed forms as Drafts and completing them later

If you have not completed all the mandatory fields on a form, and you need to leave your computer, you can save your progress as a **Draft**.

Note

Depending on the configuration of your system, drafts might expire after a predetermined length of time, e.g. 14 days.

To save the current form as a Draft

Scroll to the bottom of the form and click the **Submit** button:

RiskMan will check to see if you have completed all the mandatory fields on the form. If you haven't completed all the fields, RiskMan will give you option of saving your progress as a **Draft**, or returning to the form to complete the remaining mandatory fields.

Draft Properties

Title: The name of your draft as it will appear on your homepage.

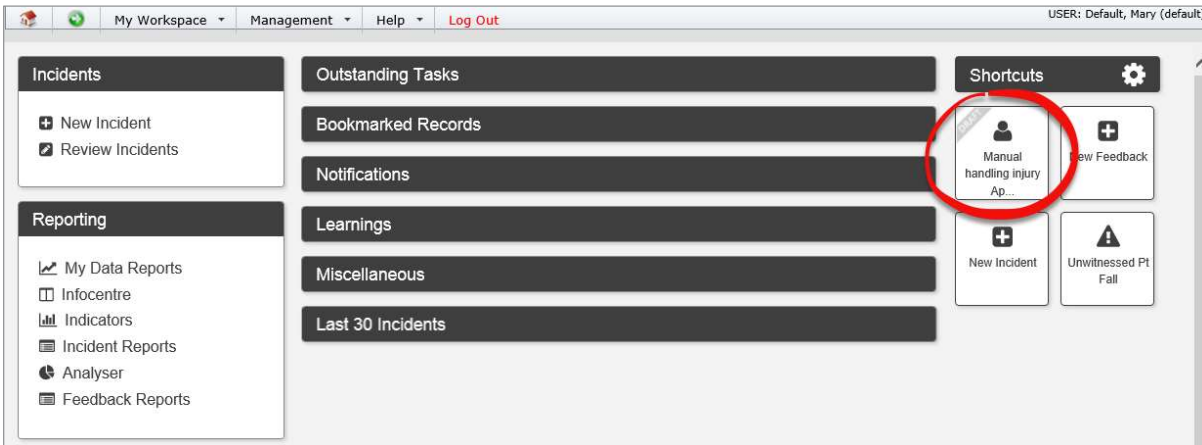

Description: The description you type here will be displayed as a tooltip when you hover your mouse over the draft on the homepage.

Icon: Choose an icon for this draft.

A screenshot of a 'Save Draft' dialog box. It has a title bar that says 'Save Draft'. Below the title bar are three input fields. The first is labeled 'Title:' and contains the text 'anual handling injury Apr 16' with a green checkmark and an information icon to its right. The second is labeled 'Description:' and contains the text 'Incident where I hurt my back trying to pick up a computer monitor' with an information icon to its right. The third is labeled 'Icon:' and shows a person icon with an information icon to its right. At the bottom of the dialog box are two buttons: 'Save' and 'Close'.

Using the Homepage

Once you save your draft, you will be returned to your homepage. Your draft is accessible from the shortcuts area:

Drafts are differentiated from Shortcuts by a “DRAFTS” banner in the top left corner of the widget:

If you want to delete a Shortcut or a Draft

On your homepage, when your mouse cursor is over a Shortcut or Draft, you will see an **X** in the top right corner. Click the **X** to delete it. You will be asked to confirm that you want to delete it, as this action cannot be undone.

If you want to restore the widgets on your page to their default heights

Click the **Settings Cog** , and in the **Miscellaneous** section, click the **Default Widget Heights** button.

The Homepage without Shortcuts or Drafts

The Shortcuts menu will not display unless there are Shortcuts to display. The cog (settings icon) will be stand alone. This allows for more spacing withing the Homepage for visible Widgets displayed.
