INTRODUCTION

The following handout describes how to create tool tips against fields on your Incident and Feedback Entry forms. Tool Tips provide additional information pertaining to specific fields on the Incident & Feedback Entry forms which aid users with entering or reviewing these notifications.

Tool Tips are accessed by selecting **ADMINISTRATION -> LIST & CODES MAINTENANCE** menu option

INCIDENT TOOL TIPS

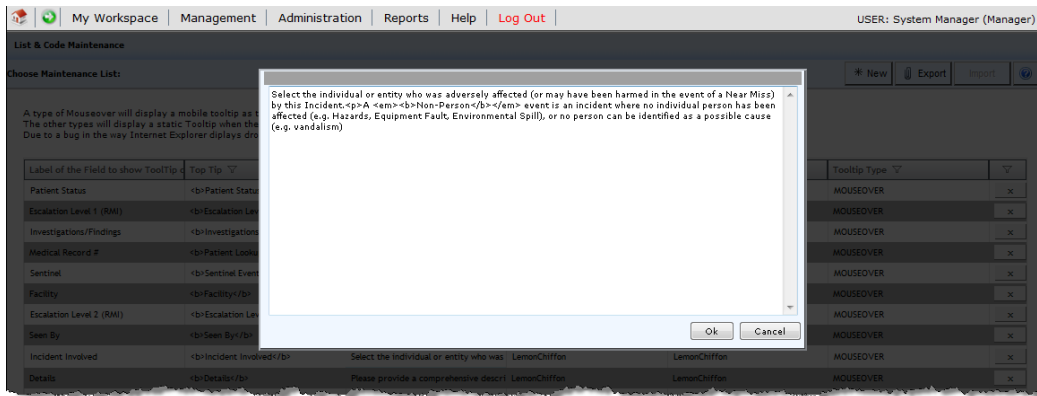

Incident Tool Tips are accessed by selecting **“Tool Tip definitions”** from the **Choose Maintenance List**

The screenshot shows the 'List & Codes Maintenance' interface. At the top, there is a navigation bar with 'My Workspace', 'Management', 'Administration', 'Reports', 'Help', and 'Log Out'. The user is identified as 'System Manager (Manager)'. The main area is titled 'List & Codes Maintenance' and contains a table with columns for 'List Caption' and 'Records Found'. A search box is visible with 'List Name: (Incidents) ToolTip Definitions' and 'Lists for Register:'. Below the table, there are several rows of tool tip definitions, each with a 'Label of the Field to show Tooltip on', a 'Top Tip', and a 'Tooltip Type' (e.g., MOUSEOVER, UNDERNEATH). The table also includes columns for 'Top Color', 'Bottom Color', and 'Tooltip Type', along with a trash icon for each row.
